United Nations Program for Development
Sponsor : Malaysia
Topic: "Is AI a threat to Development "

The United Nations Program for Human Development :

Conscious of the current rise of AI and the stakes it creates regarding the global development,

Felicitating the existent initiatives taken by the united nation toward this matter such as "United Nations High-Level Advisory Body on Artificial Intelligence" or even "Artificial Intelligence Landscape Assessment (AILA) Framework by UNDP",

Remaining worried by the mitigated international cooperation regarding the application of these regulations and advices,

Underlining the need for a global cooperation ensuring that every countries get the same opportunity in this matter regardless of its economical or development situation,

Thanking our fellow countries for reuniting to take action in order regulate this element in a way that answers everyone needs,

Hoping that this reunion will benefit to everyone in way that respects the founding engagements of this very program,

1. *Encourages* the use of AI to reduce administrative burdens on educators, allowing them to focus on teaching and interpersonal student engagement;

   a. Request every country to dispense formations on AI for education staffs,

   b. Proposes that these formations would be subventioned by UN fund raise adapting the subventions to each country needs

2. *Advocates* for AI tools to assist in personalized learning without replacing educators or undermining their role in fostering empathy and human connection;

3. *Supports* measures to prevent the replacement of teaching and technical staff by AI, ensuring that automation complements rather than substitutes human labor;

4. *Recommends* continuous professional development for educators, enabling them to integrate AI tools effectively while maintaining their pedagogical autonomy.

5. *Advocates* for international guidelines to ensure the ethical collection and use of student data by AI systems, safeguarding privacy and preventing misuse;

6. *Calls* for investments in cybersecurity measures to protect educational systems from potential threats;

7. *Requests* developed nations and international organizations to provide financial and technical assistance to underprivileged regions, ensuring equal access to AI technologies in education;

8. *Promotes* multilingual AI tools to improve accessibility for students in diverse linguistic and cultural contexts;

9. *Proposes* the creation of a UNDP working group on AI in education to facilitate knowledge exchange, develop best practices, and monitor the impact of AI on education systems globally;

10. *Encourages* alliances among countries with similar socio-economic contexts to address shared challenges and opportunities presented by AI;
