Tesla reveals a new model 3 : better driving range and cheaper

Tesla reveals a new version of the Model 3, available for individuals and professionals called the High Driving

Range RWD (Rear Wheel Drive).

It comes with a high capacity battery (80kWh) and two motors for each rear wheel, which allows it to drive for 620

km. And it's available for 45 990€ (40 990€ including the environment bonus).

Baby born from three people's DNA in UK first

In the United Kingdom, a new technique has been invented to prevent babies from being born with mitochondrial diseases, incurable diseases, which can even lead to the death of the newborn. This practice consists of taking a tiny amount of DNA from a third person. Nevertheless, it seems its success is still not certain and it could involve a risk of reversion...

Ukraine's Zelensky in Berlin as Germany Announces Billions in New Military Aid

Despite a rather passive German policy, shortly after a meeting between the Ukrainian president and the Chancellor Olaf Scholz, military aid has been agreed for about 3 billion dollars. All containing ground vehicles, reconnaissance drones and large quantities of ammunition (vital in a high intensity conflict). NATO countries are showing more and more support for Ukraine, negotiations are underway to send western fighter planes as equipment.

Cyclone Mocha: Intense Storm Hits Bangladesh And Myanmar Coast

A powerful cyclone is hitting the coastlines of Bangladesh and Myanmar after intensifying into the equivalent of a category-five storm. Cyclone Mocha is bringing heavy rain and winds of up to 195kph, which could see dangerous flooding on land around the Bay of Bengal. Forecasters warned Cyclone Mocha could be the most powerful storm seen in Bangladesh in nearly two decades.

Turkey's Election: Erdogan Built Vast Power For 20 Years, But He May Lose Sunday

If he wins, he says he would bring Turkey closer to the West politically, economically and culturally, and restart attempts to join the European Union that lost steam under Erdogan years ago.

Starting in 2003, with stints as prime minister and president, Erdogan has ruled Turkey longer than any other leader in the Turkish Republic's history.

That comes amid worries that Erdogan already has enough power - either in the government or among his backers in the streets - to overturn any election that he appears to lose.

With 62 Newly Discovered Moons, Saturn Knocks Jupiter Off Its Pedestal

Saturn now has more moons than Jupiter, with 145 compared to Jupiter's 95. The newly discovered moons of Saturn are small and irregularly shaped, and they provide valuable information about the early solar system. These moons are likely remnants of larger moons that broke apart while orbiting Saturn. The reason for Saturn having more moons is still unclear, but it could be due to a higher capture rate or a greater tendency for collisions. As astronomers continue to improve their detection methods, Saturn is expected to maintain its lead in the moon count.
