Artemis I :

A giant rocket to set new space records.

The first step of the Artemis program just started a couple weeks ago and used the most powerful rocket ever build.

More than 50 years after the first landing on the moon during the Cold War, this mission will be a great improvement with new goals : the first woman landing on the moon but also a 30 day's journey on the surface of Earth's neighbour in order to gather information for the future programs to Mars or even further.

POLITICS:

BBC, 02nd December 2022

Indonesia's parliament is about to vote for the banning of sex before marriage.

Indeed, the island is not known for its liberalism considering relations: within the majority-Muslim area of the island, LGBT members are getting lashes in public.

However, the institutionalisation of such rules (including the possibility to get a couple unmarried), strengthens the influence of the government on human rights.

American rapper Kanye West got banned from Twitter after posting antisemitic image of a swastika inside a Star of David.

It's not the first time the rapper saw his Twitter account suspended, and the last time it was also for incitement to violence against Jews. But this time, the same day, before posting an image of a swastika, the famous rapper praised Adolf Hitler in an interview on Infowars, a right-wing show hosted by Alex Jones, he said : "there is a lot of things I love about Hitler".

The American president Joe Biden Twitted to express condemnation of people that tolerate it "Our political leaders should be calling out and rejecting antisemitism wherever it hides. Silence is complicity."

Kanye West is not the only problem, since Elon Musk became the CEO of Twitter, the number of antisemitic, racist and homophobic posts increased a lot, according to organizations that monitor social media like the Center for Countering Digital Hate, by more than 61% for antisemitic posts.
