### Can we trust polls predicting a Tory 'wipeout'?

The general election is coming soon, and recent polls are assessing a defeat for the Tories. It could be their worst election since 1906, when they had only 156 seats. Their results are estimated between 53 and 155 seats, but the cause of this lack of support is not clear.

### **Euro 2024 innovations make refereeing easier but human element remains**

With every international soccer competition comes new innovations. For this Euro 2024, the arrival of a technology that detects when the ball is touched and the use of semi-automatic offside technology have not met with consensus among players and coaches, who are denouncing unfairness.

**For the release of the Elden Ring expansion, its designer reveals the secret of how he creates his game worlds.**

Hidetaka Miyazaki, President of FromSoftware, talks about his unique design approach and the success of Elden Ring. Despite his great popularity, he remains cautious, values difficulty and fosters an environment in which failure stimulates innovation. Miyazaki remains active, creating immersive, harsh yet beautiful game worlds that captivate players.
