#### **Pumped up: will a Dutch startup's plan to restore Arctic sea-ice work?**

An old method used to create skating rinks could be used to restore ice caps. The Arctic ice shrinks at a rate of 13% by decades which disturbs the ecosystems that have been here for multiple centuries and reduces its capacity to act as a "heat shield" for Earth.

### **How AI is helping the search for extraterrestrial life ?**

Bill Diamond, CEO of the Seti Institute, underscores the challenge of finding alien life amidst 10-50 billion habitable worlds. AI proves crucial, aiding in analyzing radio signals and detecting potential alien technology. Breakthrough Listen identified eight signals missed by traditional methods. AI also helps NASA's Perseverance rover detect signs of life on Mars.
