Space Telescopes Captured Asteroid Strike With Striking Clarity

Last monday, the spatial ship of Nasa, the Dart collided with a rock with the hope to modify its orbit.

It's the first case of spatial defense. Considered as an "unprecedented view of an unprecedented event" by John Hopkins, an astronomer, this try to defend which will be fully assessed in November raises optimism.

Fate of Amazon rests on Brazil election, say experts

In the current climate context, deforestation is one of the most important issues for our future. This article talks about a particular case, Brazil, which has the majority of the largest forest in the world: the Amazon Forest, for which the next elections may play a determining role.

Nazanin Zaghari-Ratcliffe cuts hair in support of Iran protests

Mahsa Amini was arrested two weeks ago by the Iranian police for breaking the rules requiring women to cover their hair. She died 3 days after from wounds caused by the police.

Anti-government people and women are protesting for human rights. It created a movement of women burning their hijabs and cutting their hair. 76 protestors have been killed by the police in two weeks. Hundreds of people have been arrested.

Behind the shining pomp of the Red Square rally is a Russia in turmoil

The staged gathering in Russia's Red Square doesn't reflect the horrific reality of war: the fact that thousands of men are leaving their homes and that tensions have never been higher for the Russian population.

Protesters attack French embassy in Burkina Faso over allegedly harboring ousted president

A new government accusation led to a wave of protests against the French embassy in Ouagadougou this Saturday (October 1st, 2022). 8 months after his *coup d'état*, the former leader of Burkina Faso Paul-Henri Sandaogo Damiba was dismissed by other putschists, led by Ibrahim Traoré. The next day, the new government accused France of harboring Damida. The charge was quickly denied by the French Ministry of Foreign Affairs.
