Nasa says distant exoplanet could have rare water ocean and possible hint of life

The space agency's James Webb telescope sent light years away from earth, has discovered the existence of a possible rare water ocean on an exoplanet, named K2-18b. The scientific study of the chemical composition of the planet's atmosphere has revealed the potential existence of a molecule called dimethyl sulfide, that is only produced by life on Earth.

Morocco mourns the consequences of the earthquake

Bringing families to spend the night outside in fear of further damage, the earthquake hit Morocco around 11:11 pm, on the 9th of September. The earthquake struck from its epicenter, in the High Atlas Mountains, to as far as Casablanca with a magnitude of 6.8. The county is mourning thousands of deaths, injured and unaccounted for as well as the destruction of some towns and beloved monuments. While rescue teams are struggling with the research, some countries have shown their support with aid teams, financial help and medical assistance.

The Rolling Stones confirm details of new album Hackney Diamonds

The Rolling Stones have announced their first album since 2005, titled "Hackney Diamonds," . It will contain 12 tracks and is set to be released on October 20. The band revealed the album at an event in Hackney and features Steve Jordan on drums in place of Watts because he unfortunately passed away in 2021 from throat cancer. The project also includes a song with Lady Gaga, and it incorporates an eclectic mix of genres.
