Over 280 people are dead and 900 injured after 2 trains derailed in India

The Indian biggest train accident just happened this weekend. Two trains derailed just after they crashed into each other. It is said it has been caused by poor signaling and outdated trains. The death toll is still rising.

Dogs attacked more than 5,300 mail carriers last year in US.

It doesn't just happen in the movies!

Mail carriers are even trained to predict and counter dog attacks. Officials are asking pet owners to take a few steps that could help protect postal workers such as keeping dogs inside, behind a fence or on a leash when the mail carrier arrives. In all the countries, Houston had the highest number of attacks of any city and California is the most affected state with 675 victims.

Nearly 80 schoolgirls believed poisoned in Afghanistan

Last Saturday in the north of Afghanistan in Sar-e-pul province nearly 80 girls were poisoned and hospitalized during an attack in their school, we don't have information on how the girls were poisoned. The responsible of this event probably had personal grudge but did not elaborate. It is the first time that this kind of assault happened since the Taliban took the control of Afghanistan. Moreover, in Afghanistan the situation of women is really bad, women can't study after 6th grade and they cannot have access to every job, most women there can't work. So, this event shows that some people do not even want women to study before 6th grade and so it shows that women's situation can become even worse.
